SUMMARY

Full Stack Developer and AI/ML engineer skilled in MERN stack (MongoDB, Express.js, React.js, Node.js) and real-time projects using Python. Proficient in building web applications, REST APIs, TTS models, AI/ML models and prompt engineering demonstrated through hands-on internship experience.

EDUCATION

Institute of Aeronautical Engineering, Hyderabad

B.Tech in Computer Science and Engineering (AI & ML) | 2022–2026 | CGPA: 7.14

Sri Chaitanya Junior College — *Intermediate* | 96.1%

Sri Chaitanya High School — *SSC* | GPA: 10

SKILLS

- **Programming Languages:** Python, JavaScript, Java, SQL
- **Frontend:** HTML, CSS, Tailwind.css, Bootstrap, React.js
- **Backend & Database:** MongoDB, Express.js, Node.js, REST APIs
- **Databases:** MongoDB, MySQL
- **Specializations:** Machine Learning, Neural Networks, NLP, Prompt Engineering, AI agents
- **Tools & Platforms:** Git, GitHub, Microsoft Office, Visual Studio Code

INTERNSHIPS

AI Engineer Intern - Humera AI

Mar 2026 - present

- Working with lip-sync, voice cloning, and Text-to-Speech (TTS) models, focusing on improving speech synthesis quality and audiovisual alignment.
- Applied prompt engineering techniques, AI agents development tools to automate workflows and optimize model interaction.

REACT Developer Intern - Amigo Smart Tech PVT LTD

Oct 2024 - Dec 2024

- Developed reusable React components and implemented state management using Hooks and Context API for real-time cart updates.
- Optimized component architecture for modularity and maintainability

Data Science Intern - NSIC (National Small Industries Corporation)

July 2023 - Aug 2023

- Built supervised and unsupervised machine learning models in Python, achieving up to ~ 92% accuracy on guided datasets.
- Performed data preprocessing and feature engineering, improving model performance by ~15%.

PROJECTS

Sign Language Recognition

- Developed a real-time sign language recognition system using the MobileNetV4 object detection model to classify and interpret hand gestures from video feeds.
- Achieved ~90% accuracy in gesture detection and text translation.

AI Fitness Tracker - live

- Developed a full-stack fitness tracking web application enabling users to set daily goals, monitor calorie intake, and track calories burned, with secure authentication.
- Integrated Grok AI for food image analysis to automatically estimate calories from uploaded meal photos and built a responsive modern UI for seamless user experience.

CERTIFICATIONS

- Machine Learning specialization by Stanford University - Coursera
- Python for Data Science - NPTEL
- MERN Stack - GeeksForGeeks

ACTIVITIES

- LeetCode : Global Rank - 265,558 | Solved 400+ problems
- HackerRank : 2 Batches | 3 Certificates
- Secured 10th place out of 1500+ participants in Winter coding contest 4.0 by VNR VJIE
- Achieved 7th place in Stratum Hackathon, focusing on ML solutions for real-world problems at Malla Reddy university
