SUMMARY

AI/ML Engineer and Full-Stack Developer with hands-on experience in Agentic AI, LLMs, Computer Vision, and MERN Stack. Built scalable AI-powered applications and autonomous multi-agent systems through industry internships and real-world projects. Passionate about solving complex problems by developing intelligent, production-ready solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, Java

AI / ML: ML, DL, NLP, LLMs, Prompt engineering, AI agents, TTS models

Web Development: React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, REST APIs

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Vercel, Render

INTERNSHIP EXPERIENCE

AI Engineer Intern — *Humera AI*

Mar 26 — Apr 26

Python · LLMs · NLP · TTS Models · AI Agents · Prompt Engineering

- Built multi-step AI agent workflows using structured prompt engineering, standardizing LLM output formats and reducing manual intervention in the content pipeline.
- Improved TTS audio-video alignment pipelines, increasing lip-sync accuracy and output rendering quality across production test cases.
- Developed 10+ reusable prompt templates for LLM interactions, improving response consistency and reducing hallucination rate in automated generation tasks

React Developer Intern — *Amigo Smart Tech Pvt. Ltd.*

Oct 24 — Dec 24

React.js · JavaScript · HTML5 · Tailwind CSS · REST APIs · Git/GitHub

- Architected a reusable React component library used across pages, improving UI consistency and reducing feature development time.
- Built a full cart-management system from scratch using React Hooks (useState, useContext) for global state, eliminating Redux dependency and reducing bundle overhead.
- Delivered features through a pull-request workflow on a live production codebase, following code-review and component-driven development practices.

PROJECTS

Sign Language Recognition System — *Python, TensorFlow, MobileNetV2, OpenCV, MediaPipe* ([GitHub](#))

- Trained a MobileNetV2 transfer-learning model on a 29-class ASL alphabet dataset (A-Z, del, nothing, space) with an 80/20 train-test split, achieving 97.22% accuracy on live webcam input.
- Built a computer vision preprocessing pipeline using MediaPipe hand-landmark detection, image normalization, and data augmentation to improve robustness across lighting conditions.
- Deployed as a real-time inference system translating classified gestures into text output to support communication for the hearing-impaired

AgentHire – Multi-Agent Job Assitant - *Python, FastAPI, LangGraph, React, Groq API* ([GitHub](#))

- Architected an autonomous multi-agent pipeline with LangGraph StateGraph orchestration, sequencing resume parsing, job-description analysis, ATS scoring, resume tailoring, AI critique, and document generation nodes.
- Built a multi-dimensional ATS scoring engine that evaluates resume-to-job compatibility across skill, keyword, and an independent AI critic agent that reviews resumes for grammar, readability, and hallucination safety.
- Developed a full-stack React + FastAPI application with an analytics dashboard (TanStack Query, Recharts) for tracking applications, and automated ATS-compliant DOCX/PDF resume generation using python-docx.

EDUCATION

B.Tech, CSE (AI & ML) — Institute of Aeronautical Engineering, Hyderabad · CGPA: 7.24

2022 — 2026

Intermediate (MPC) — Sri Chaitanya Junior College, Hyderabad · 96.1%

2020 — 2022

SSC — Sri Chaitanya High School, Hyderabad · GPA: 10

2020

CERTIFICATIONS

- Machine Learning Specialization — Stanford University / Coursera (Andrew Ng)
- Python for Data Science — NPTEL
- React.js — Infosys Springboard
- MERN Stack — GeeksforGeeks

ACHIEVEMENTS & ACTIVITIES

- Solved 400+ problems on LeetCode
- Secured 10th place of 1,500+ participants, Winter Coding Contest 4.0, VNR VJIET
- Achieved 7th place, Stratum Hackathon (ML solutions track), Malla Reddy University
- Earned 2 Gold Badges & 3 Certificates on [HackerRank](#)
